

# POTABLE WATER LEVEL

**EXPLOSION PROOF**

**INTRINSICALLY SAFE**

**TRUCK • BUSES • MARINE • INDUSTRIAL • AIRCRAFT**

- ANY ENGINE
- EASY TO INSTALL
- ANY TANK SIZE
- ANY SUMP SIZE
- ACCURACY – FULL SCALE  $\pm 1\%$
- WARRANTED FOR 3 YEARS
- NO LIMIT USEFUL LIFE

This is a direct reading instrument, driven by the column pressure generated in the sender by the height of the liquid. The pressure is transferred to the gauge through a 4mm tube. This results in a full scale accuracy of  $\pm 1\%$ . The unit can be installed in instrument or remotely mounted.

The 4mm tube, which will tolerate  $-62^{\circ}$  to  $205^{\circ}$  C, is similar to the brake lines used on heavy duty trucks and buses. It can be extended in excess of 30.48m. Connections are made utilizing push in fittings that utilize an "O" ring seal. This connection must be lubricated with the supplied lubricant to assure a proper seal. Fittings are proprietary.

Tank depth required. Specify adapter requirement.

Equipped with: Firewall fitting and 2.75m of 4mm tube.

ANY ENGINE

## PURGE PUMP

Purge Pump is necessary when the liquid level sender is inaccessible.
